# Volume Contents

## Number 1. January

1 **Energetics of Amino Acid Uptake by *Vicia faba* Leaf Tissues**—Jean-Pierre Despeghel and Serge Delrot

7 **Nitrogen Redistribution during Grain Growth in Wheat (*Triticum aestivum* L.). IV. Development of a Quantitative Model of the Translocation of Nitrogen to the Grain**—Richard J. Simpson, Hans Lambers, and Michael J. Dalling

15 **Inhibition of Abscisic Acid Biosynthesis in *Cercospora rosicola* by Inhibitors of Gibberellin Biosynthesis and Plant Growth Retardants**—Shirley M. Norman, Stephen M. Poling, Vincent P. Maier, and Edward D. Orme

19 **Purification and Characterization of a New Indole Oxygenase from the Leaves of *Tecoma stans* L.**—Satya P. Kunapuli and Chelarkara S. Vaidyanathan

24 **Isolation of Mitochondria from Leaf Tissue of *Panicum miliaceum*, a NAD-Malic Enzyme Type $C_4$ Plant**—Per Gardeström and Gerald E. Edwards

30 **Effects of $O_2$ Concentration on Rice Seedlings**—Amedeo Alpi and Harry Beevers

35 **Nuclear Suppressors of the Photosensitivity Associated with Defective Photosynthesis in *Chlamydomonas reinhardii***—Robert J. Spreitzer and William L. Ogren

40 **Expression of Storage Protein Genes in Developing Wheat (*Triticum aestivum* L.) Seeds. Correlation of RNA Accumulation and Protein Synthesis**—Frank C. Greene

47 **Regulation of Legumin Levels in Developing Pea Seeds under Conditions of Sulfur Deficiency. Rates of Legumin Synthesis and Levels of Legumin mRNA**—Peter M. Chandler, Thomas J. V. Higgins, Peter J. Randall, and Donald Spencer

55 **Structural Features Required for Inhibition of Soybean Lipoxygenase-2 by Propyl Gallate. Evidence that Lipoxygenase Activity Is Distinct from the Alternative Pathway**—T. Kaye Peterman and James N. Siedow

59 **Carbon Dioxide Effects on Ethanol Production, Pyruvate Decarboxylase, and Alcohol Dehydrogenase Activities in Anaerobic Sweet Potato Roots**—Ling A. Chang, Larry K. Hammett, and David M. Pharr

63 **Effect of Photosynthetic Inhibitors and Uncouplers of Oxidative Phosphorylation on Nitrate and Nitrite Reduction in Barley Leaves**—Noah Ben-Shalom, Ray C. Huffaker, and Lawrence Rappaport

67 **Metabolism of Oat Leaves during Senescence. VII. The Interaction of Carbon Dioxide and Other Atmospheric Gases with Light in Controlling Chlorophyll Loss and Senescence**—Sergio O. Satler and Kenneth V. Thimann

71 **Relationships between Photosynthetically Active Radiation, Nocturnal Acid Accumulation, and $CO_2$ Uptake for a Crassulacean Acid Metabolism Plant, *Opuntia ficus-indica***—Park S. Nobel and Terry L. Hartsock

76 **Inhibition of $\beta$-1,4-Glucan Biosynthesis by Deoxyglucose. The Effect on the Glucosylation of Lipid Intermediates**—Roelf Datema, Ralph T. Schwarz, Liliana A. Rivas, and Rafael Pont Lezica

82 **Characterization of the Isozymes of $\alpha$-Mannosidase Located in the Cell Wall, Protein Bodies, and Endoplasmic Reticulum of *Phaseolus vulgaris* Cotyledons**—Willem Van der Wilden and Maarten J. Chrispeels

88 **Enzymic Mechanism of Starch Breakdown in Germinating Rice Seeds. 15. Immunochemical Study on Multiple Forms of Amylase**—Jean Daussant, Susumu Miyata, Toshiaki Mitsui, and Takashi Akazawa

96 **Hypobaric Control of Ethylene-Induced Leaf Senescence in Intact Plants of *Phaseolus vulgaris* L.**—Karl N. Nilsen and Clinton F. Hodges

102 **Measurement of $CO_2$ and $H_2O$ Vapor Exchange in Spinach Leaf Discs. Effects of Orthophosphate**—Gary C. Harris, John K. Cheesbrough, and David A. Walker

108 **Effects of Mannose on Photosynthetic Gas Exchange in Spinach Leaf Discs**—Gary C. Harris, John K. Cheesbrough, and David A. Walker

112 **Effect of Inhibitors on Ammonia-, 2-Oxoglutarate-, and Oxaloacetate-Dependent $O_2$ Evolution in Illuminated Chloroplasts**—K. C. Woo

118 **Cellular Expansion at Low Temperature as a Cause of Membrane Lesions**—R. Paul Willing and A. Carl Leopold

122 **Significance of Hydrogen Evolution in the Carbon and Nitrogen Economy of Nodulated Cowpea**—Ross M. Rainbird, Craig A. Atkins, John S. Pate, and Paul Sanford

128 **Relation between the Light-Harvesting Chlorophyll $\alpha$-Protein Complex LHCPa and Photosystem I in the Alga *Chlamydobotrys stellata***—Peter Brandt, Elke Zufall, and Wolfgang Wiessner

132 **$\beta$-Galactosidases in Ripening Tomatoes**—Russell Pressey

136 **Expression of 5-Methyltryptophan Resistance in Plants Regenerated from Resistant Cell Lines of *Datura innoxia***—Jerome P. Ranch, Susan Rick, Jeff E. Brotherton, and Jack M. Widholm

141 **Relation of Increased Potassium Nutrition to Photosynthesis and Translocation of Carbon**—Donald R. Geiger and Terrance R. Conti

145 **Nitrate Reductase-Deficient Mutants in Barley. Immunoelectrophoretic Characterization**—David A. Somers, Tsung-Min Kuo, Andris Kleinhofs, and Robert L. Warner

150 **Phosphofructokinase Activities in Photosynthetic Organisms. The Occurrence of Pyrophosphate-Dependent 6-Phosphofructokinase in Plants and Algae**—Nancy Wieland Carnal and Clanton C. Black

156 **Analysis of the Heterogeneity of the 40,000 Molecular Weight Tuber Glycoprotein of Potatoes by Immunological Methods and by $NH_2$-Terminal Sequence Analysis**—William D. Park, Cheri Blackwood, Greg A. Mignery, Mark A. Hermodson, and Richard M. Lister

161 **Induction and Accumulation of Major Tuber Proteins of Potato in Stems and Petioles**—Edilson Paiva, Richard M. Lister, and William D. Park

169 **Volume Regulation in *Poterioochromonas*. Involvement of Calmodulin in the $Ca^{2+}$-Stimulated Activation of Isofloridoside-Phosphate Synthase**—Heinrich Kauss

173 ***In Vivo* Synthesis and Turnover of $\alpha$-Amylase in Attached and Detached Cotyledons of *Vigna mungo* Seeds**—Tomokazu Koshiba and Takao Minamikawa

177 **Effect of Methionine Sulfoximine on the Accumulation of Ammonia in $C_3$ and $C_4$ Leaves. The Relationship between $NH_3$ Accumulation and Photorespiratory Activity**—Francis Martin, Michael J. Winspear, John D. MacFarlane, and Ann Oaks

182 **Inhibition by Calcium of Senescence of Detached Cucumber Cotyledons. Effect on Ethylene and Hydroperoxide Production**—Ian B. Ferguson, Christopher B. Watkins, and Jane E. Harman

187 **Reduced Glutathione as an Effector of Phosphoenolpyruvate Carboxylase of the Crassulacean Acid Metabo-**

lism Plant *Sedum praealtum* D.C.—Yiannis Manetas and Nikos A. Gavalas

SHORT COMMUNICATIONS

190 **Partial Sequence Analysis of the 5S to 18S rRNA Gene Region of the Maize Mitochondrial Genome**—Shiaoman Chao, Ronald R. Sederoff, and Charles S. Levings, III

194 **Cytochromes of *Rhizobium japonicum* 61A76 Bacteroids from Soybean Nodules**—Donald L. Keister, Sarah S. Marsh, and Mehreshan T. El Mokadem

197 **Identification and Metabolism of 1-(Malonylamino)-cyclopropane-1-carboxylic Acid in Germinating Peanut Seeds**—Neil E. Hoffman, Jai-Rui Fu, and Shang Fa Yang

200 **Elevated Riboflavin Requirement of Postphotoinductive Events in Sporulation of a *Trichoderma* Auxotroph**—Benjamin A. Horwitz and Jonathan Gressel

205 **Purification of Squash NADH:Nitrate Reductase by Zinc Chelate Affinity Chromatography**—Margaret G. Redinbaugh and Wilbur H. Campbell

208 **Adaptation of the Cyanobacterium *Anabaena variabilis* to Low $CO_2$ Concentration in Their Environment**—Yehouda Marcus, Eitan Harel, and Aaron Kaplan

211 **Oxindole-3-acetic Acid, an Indole-3-acetic Acid Catabolite in *Zea mays***—Dennis M. Reinecke and Robert S. Bandurski

## Number 2. February

215 **Heat Shock Proteins in Maize**—Pam Cooper and Tuanhua David Ho

223 **A Comparison of the Surface Polysaccharides from *Rhizobium leguminosarum* 128C53 $sm^r rif^r$ with the Surface Polysaccharides from Its $Exo^{-1}$ Mutant**—Russell W. Carlson and Ru-Po Lee

229 **Specific Determination of α-Amylase Activity in Crude Plant Extracts Containing β-Amylase**—Douglas C. Doehlert and Stanley H. Duke

235 **Mode of Action of a Herbicide. Johnsongrass and Methanearsonic Acid**—Francis C. Knowles and Andrew A. Benson

241 **Adaptation of *Lemna paucicostata* to Sublethal Methionine Deprivation**—Gregory A. Thompson, Anne H. Datko, and S. Harvey Mudd

248 **Light Activation of Purified Aconitase by Washed Thylakoid Membranes of Pea (*Pisum sativum* L.)**—A. Habib Mohamed and Louise E. Anderson

251 **Phytoalexin Induction in French Bean. Intercellular Transmission of Elicitation in Cell Suspension Cultures and Hypocotyl Sections of *Phaseolus vulgaris***—Richard A. Dixon, Prakash M. Dey, Michael A. Lawton, and Christopher J. Lamb

257 **Metabolism of Tritiated Gibberellins $A_4$ and $A_9$ in Norway Spruce, *Picea abies* (L.) Karst. Effects of a Cultural Treatment Known to Enhance Flowering**—Arne Dunberg, Gunilla Malmberg, Takeshi Sassa, and Richard P. Pharis

263 ***N*-Methyl Mesoporphyrin IX Inhibits Phycocyanin, but Not Chlorophyll Synthesis in *Cyanidium caldarium***—Samuel I. Beale and Nancy C. Chen

269 **Developmental Changes in the Potential for $H_2S$ Emission in Cucurbit Plants**—Heinz Rennenberg and Philip Filner

276 **Mechanical Properties of the Plasma Membrane of Isolated Plant Protoplasts. Mechanism of Hyperosmotic and Extracellular Freezing Injury**—Joe Wolfe and Peter L. Steponkus

286 ***In Vivo* Blue-Light Activation of *Chlamydomonas reinhardii* Nitrate Reductase**—María Pilar Azuara and Pedro J. Aparicio

291 **Assimilation of $[^{15}N]$Nitrate and $[^{15}N]$Nitrite in Leaves of Five Plant Species under Light and Dark Conditions**—Andrew J. Reed, David T. Canvin, Joseph H. Sherrard, and Richard H. Hageman

295 ***De Novo* Synthesis of 3′-Nucleotidase in Germinating Wheat Embryo**—Zhi-Ping Zhu, Loren Marsh, and Abraham Marcus

300 **Endogenous Inactivators of Arginase, L-Arginine Decarboxylase, and Agmatine Amidinohydrolase in *Evernia prunastri* Thallus**—María Estrella Legaz and Carlos Vicente

303 **Metabolism of Magnesium Protoporphyrin Monomethyl Ester in *Chlamydomonas reinhardtii***—Mark S. Crawford and Wei-Yeh Wang

307 **Amitrole Absorption by Bean (*Phaseolus vulgaris* L. cv 'Red Kidney') Roots. Mechanism of Absorption**—Francis T. Lichtner

313 **Physiology of Movements in the Stems of Seedling *Pisum sativum* L. cv Alaska. III. Phototropism in Relation to Gravitropism, Nutation, and Growth**—Steven J. Britz and Arthur W. Galston

319 ***In Vivo* Metabolism of 5′-Methylthioadenosine in *Lemna***—John Giovanelli, Anne H. Datko, S. Harvey Mudd, and Gregory A. Thompson

327 **Partial Purification and Characterization of a Glycoprotein Cell Fusion Hormone from *Griffithsia pacifica*, a Red Alga**—Bruce A. Watson and Susan D. Waaland

333 **Release of Sucrose from *Vicia faba* L. Leaf Discs**—James Michael Anderson

341 **Amino Acid Sequence of Mung Bean Trypsin Inhibitor and Its Modified Forms Appearing during Germination**—Karl A. Wilson and Jean C. Chen

350 **Characterization of a $K^+$-Stimulated Adenosine Triphosphatase Associated with the Plasma Membrane of Red Beet**—Donald P. Briskin and Ronald J. Poole

356 **Cytokinins of the Developing Mango Fruit. Isolation, Identification, and Changes in Levels during Maturation**—Wen-Shaw Chen

362 **Involvement of Abscisic Acid in Potato Cold Acclimation**—Hwei-Hwang Chen, Paul H. Li, and Mark L. Brenner

366 **Galactosyltransferases Involved in Galactolipid Biosynthesis Are Located in the Outer Membrane of Pea Chloroplast Envelopes**—Kenneth Cline and Kenneth Keegstra

373 **Diurnal Changes in Volume and Specific Tissue Weight of Crassulacean Acid Metabolism Plants**—Sheng-Shu Chen and Clanton C. Black, Jr.

379 **Role of the Colorless Polypeptides in Phycobilisome Assembly in *Nostoc* sp.**—Barbara A. Zilinskas and Dawn A. Howell

388 **Effects of Photosystem II Herbicides on the Photosynthetic Membranes of the Cyanobacterium *Aphanocapsa* 6308**—Mary Mennes Allen, Anne C. Turnburke, Emily A. Lagace, and Katherine E. Steinback

394 **Reversible Dark-Induced Senescence of Soybean Root Nodules**—N. E. Pfeiffer, Nasir S. A. Malik, and Fred W. Wagner

400 **Changes in the Electrophoretic Patterns of the Soluble Proteins of Winter Wheat and Rye following Cold Acclimation and Desiccation Stress**—Yves Cloutier

404 **Relationship between the Kinetic Properties and the Small Subunit Composition of *Nicotiana* Ribulose-1,5-bis-**

**phosphate Carboxylase**—L. R. Li, Verne A. Sisson, and S. D. Kung

409 **Structure of the Thylakoids and Envelope Membranes of the Cyanelles of *Cyanophora paradoxa***—Thomas H. Giddings, Jr., Cathy Wasmann, and L. Andrew Staehelin

420 **Cytochemical and Cytofluorometric Evidence for Guard Cell Photosystems**—Kevin C. Vaughn and William H. Outlaw, Jr.

425 **Photosynthesis of Grass Species Differing in Carbon Dioxide Fixation Pathways. VIII. Ultrastructural Characteristics of *Panicum* Species in the *Laxa* Group**—R. Harold Brown, Joseph H. Bouton, Luanne Rigsby, and Mark Rigler

**SHORT COMMUNICATIONS**

432 **Abscisic Acid Accumulation in Cotton Leaves in Response to Dehydration at High Pressure**—Robert C. Ackerson and John W. Radin

434 **Gas Chromatography-Mass Spectroscopy Identification of 1-Aminocyclopropane-1-carboxylic Acid in Compressionwood Vascular Cambium of *Pinus contorta* Dougl.**—Rodney A. Savidge, Gerard M. C. Mutumba, James K. Heald, and Philip F. Wareing

437 **Enclosure of Mitochondria by Chloroplasts**—R. Harold Brown, Luanne L. Rigsby, and Danny E. Akin

440 **On the Ratio of Photosynthetic Reaction Centers RC2/RC1 in *Chlorella***—Jack Myers and Jo-Ruth Graham

443 **Correction**

## Number 3. March

447 **Comparison of the Glyoxysomes and the Glyoxysomal Enzymes in Maize Lines with High or Low Oil Content**—Athanasios S. Tsaftaris and John G. Scandalios

451 **Light and Stomatal Metabolism. I. Possible Involvement of Light Modulation of Enzymes in Stomatal Movement**—I. Madhusudana Rao and Louise E. Anderson

456 **Light and Stomatal Metabolism. II. Effects of Sulfite and Arsenite on Stomatal Opening and Light Modulation of Enzymes in Epidermis**—I. Madhusudana Rao and Louise E. Anderson

460 **β-1,3-Endoglucanase from Soybean Releases Elicitor-Active Carbohydrates from Fungus Cell Walls**—N. T. Keen and M. Yoshikawa

466 **Phytoalexin Elicitor Activity of Carbohydrates from *Phytophthora megasperma* f.sp. *glycinea* and Other Sources**—N. T. Keen, M. Yoshikawa, and M. C. Wang

472 **Nitrogen Turnover and Assimilation during Regrowth in *Trifolium subterraneum* L. and *Bromus mollis* L.**—Donald A. Phillips, D. Michael Center, and Milton B. Jones

477 **Metabolism of Abscisic Acid and Its Regulation in *Xanthium* Leaves during and after Water Stress**—Jan A. D. Zeevaart

482 **Resolution and Properties of a Protein Kinase Catalyzing the Phosphorylation of a Wheat Germ Cytokinin-Binding Protein**—Gideon M. Polya and Jeffrey R. Davies

489 **Purification and Properties of a High Specific Activity Protein Kinase from Wheat Germ**—Jeffrey R. Davies and Gideon M. Polya

496 **Ammonia Assimilation in the Roots of Nitrate- and Ammonia-Grown *Hordeum vulgare* (cv Golden Promise)**—P. Anthony Fentem, Peter J. Lea, and George R. Stewart

502 **Action of Inhibitors of Ammonia Assimilation on Amino Acid Metabolism in *Hordeum vulgare* L. (cv Golden Promise)**—P. Anthony Fentem, Peter J. Lea, and George R. Stewart

507 **Plasma Membrane ATPase of Red Beet Forms a Phosphorylated Intermediate**—Donald P. Briskin and Ronald J. Poole

513 **Modulation of NADP-Malate Dehydrogenase Activity in Maize Mesophyll Chloroplasts**—Richard C. Leegood and David A. Walker

519 **Isolation and Characterization of Oat Aleurone and Starchy Endosperm Protein Bodies**—Erik T. Donhowe and David M. Peterson

524 **Kinetin Increases Water Permeability of Phosphatidylcholine Lipid Bilayers**—William Stillwell and Paul Hester

531 **Transport and Metabolism of Sucrose *versus* Hexoses in Relation to Growth in Etiolated Pea Stem**—Rangil Singh and Gordon Maclachlan

536 **Comparison between Ultraviolet Irradiation and Ethylene Effects on Senescence Parameters in Carnation Flowers**—Amihud Borochov and John Faragher

541 **Inhibition of Ethylene Biosynthesis in Carnation Petals by Cytokinin**—Yoram Mor, Hanna Spiegelstein, and Abraham H. Halevy

547 **Characterization of a Selenocystine-Resistant Carrot Cell Line. Alterations in Cystine and Sulfate Uptake**—Ian J. Furner and Zinmay R. Sung

551 **Mechanism of Inhibition of Jack Bean α-Mannosidase by Swainsonine**—Mohinder S. Kang and Alan D. Elbein

555 **Effects of Different Inorganic Nitrogen Sources on Photosynthetic Carbon Metabolism in Primary Leaves of Non-nodulated *Phaseolus vulgaris* L.**—Ivano A. Marques, Maurin J. Oberholzer, and Karl H. Erismann

562 **Temperature Dependence of Vegetative Growth and Dark Respiration: a Mathematical Model**—Martin P. N. Gent and Herbert Z. Enoch

568 **Influence of Oxygen and Temperature of the Dark Inactivation of Pyruvate,Orthophosphate Dikinase and NADP-Malate Dehydrogenase in Maize**—Hitoshi Nakamoto and Gerald E. Edwards

574 **Relationship between Photosynthesis and Respiration. The Effect of Carbohydrate Status on the Rate of $CO_2$ Production by Respiration in Darkened and Illuminated Wheat Leaves**—Joaquín Azcón-Bieto and C. Barry Osmond

582 **Reversible Inactivation of Nitrate Reductase by NADH and the Occurrence of Partially Inactive Enzyme in the Wheat Leaf**—Arun P. Aryan, Richard G. Batt, and William Wallace

588 **Light Stimulation of Ethylene Release from Leaves of *Gomphrena globosa* L.**—Bernard Grodzinski, Ingrid Boesel, and Roger F. Horton

594 **Membrane-Associated ATPases in Isolated Secretory Vesicles**—Lynne L. W. Binari and Richard H. Racusen

598 **Redox Reactions between Kaempferol and Illuminated Chloroplasts**—Umeo Takahama

602 **Effect of Varying $CO_2$ Partial Pressure on Photosynthesis and on Carbon Isotope Composition of Carbon-4 of Malate from the Crassulacean Acid Metabolism Plant *Kalanchoë daigremontiana* Hamet et Perr.**—Joseph A. M. Holtum, Marion H. O'Leary, and C. Barry Osmond

610 **Anion-Sensitive, $H^+$-Pumping ATPase in Membrane Vesicles from Oat Roots**—Kathleen A. Churchill and Heven Sze

618 **Nitrate Reductase Activity in Shoots and Roots of Maize Seedlings as Affected by the Form of Nitrogen Nu-**

**trition and the pH of the Nutrient Solution**—Konrad Mengel, Paul Robin, and Louis Salsac

623 **Effects of Aspartate and Other Compounds on Glyphosate Uptake and Growth Inhibition in Cultured Carrot Cells**—Emerson D. Nafziger, Jack M. Widholm, and Fred W. Slife

627 **Properties of Substantially Chlorophyll-Free Pea Leaf Mitochondria Prepared by Sucrose Density Gradient Separation**—Diane Nash and Joseph T. Wiskich

635 **Release of Protein from Normal and Mutant Tomato Cell Walls**—Graeme E. Hobson, Christine Richardson, and David J. Gillham

639 **Gibberellins and Heterosis in Maize. I. Endogenous Gibberellin-like Substances**—Stewart B. Rood, Richard P. Pharis, Masaji Koshioka, and David J. Major

645 **Gibberellins and Heterosis in Maize. II. Response to Gibberellic Acid and Metabolism of [$^3$H]Gibberellin $A_{20}$**—Stewart B. Rood, Terence J. Blake, and Richard P. Pharis

652 **Carbon Dioxide Fixation in Roots and Nodules of *Alnus glutinosa*. I. Role of Phosphoenolpyruvate Carboxylase and Carbamyl Phosphate Synthetase in Dark $CO_2$ Fixation, Citrulline Synthesis, and $N_2$ Fixation**—Peter R. McClure, George T. Coker, III, and Karel R. Schubert

658 **Phosphoglycerate Dehydrogenase from Soybean Nodules. Partial Purification and Some Kinetic Properties**—Michael J. Boland and Karel R. Schubert

662 **Partial Purification and Properties of an Alkaline α-Galactosidase from Mature Leaves of *Cucurbita pepo***—Pierre-Richard Gaudreault and John A. Webb

669 **Effects of Age, Water Stress, and 1-Aminocyclopropane-1-carboxylic Acid on Leaflet Movement in *Albizzia julibrissin***—Youngsook Lee and Ruth L. Satter

673 **A New Mechanism for Adaptation to Changes in Light Intensity and Quality in the Red Alga *Porphyra perforata*. III. Fluorescence Transients in the Presence of 3-(3,4-Dichlorophenyl)-1,1-dimethylurea**—Kazuhiko Satoh and David C. Fork

677 **Variable Photosynthetic Metabolism in Leaves and Stems of *Cissus quadrangularis* L.**—Irwin P. Ting, Leonel O. Sternberg, and Michael J. DeNiro

680 **Influence of Adenosine Phosphates and Magnesium on Photosynthesis in Chloroplasts from Peas, *Sedum*, and Spinach**—George J. Piazza and Martin Gibbs

688 **Iron Nutrition-Mediated Chloroplast Development**—John N. Nishio and Norman Terry

692 **$^{14}$C Tracer Evidence for Synthesis of Choline and Betaine via Phosphoryl Base Intermediates in Salinized Sugarbeet Leaves**—Andrew D. Hanson and David Rhodes

SHORT COMMUNICATIONS

701 **Translocation of [$^{14}$C]Sucrose in Wheat**—Nina L. Robinson and John E. Hendrix

703 **Intracellular Distribution of Free Sugars in Quiescent Cottonseed**—Linda L. Muller and Thomas J. Jacks

705 **Correction**

## Number 4. April

707 ***Solubilization and Partial Purification of N,N'-Dicyclohexylcarbodiimide-Sensitive ATPase from Pea Cotyledon Mitochondria***—Mark B. Whisson and Mary S. Spencer

712 **Inhibition of Coral and Algal Photosynthesis by $Ca^{2+}$-Antagonist Phenothiazine Drugs**—John E. Burris and Clanton C. Black, Jr.

716 **Comparison of Ethylenediaminetetraacetate-Enhanced Exudation from Detached and Translocation from Attached Bean Leaves**—Robert J. Fellows and Jan A. D. Zeevaart

719 ***Regulation of Cell Shape in Euglena gracilis*. I. Involvement of the Biological Clock, Respiration, Photosynthesis, and Cytoskeleton**—Thomas A. Lonergan

731 **Nitrate and Nitrite Reduction in Relation to Nitrogenase Activity in Soybean Nodules and *Rhizobium japonicum* Bacteroids**—Brian D. Stephens and Carlos A. Neyra

736 **Alcohol Dehydrogenase and an Inactivator from Rice Seedlings**—Shoji Shimomura and Harry Beevers

742 **Alcohol Dehydrogenase Inactivator from Rice Seedlings. Properties and Intracellular Location**—Shoji Shimomura and Harry Beevers

747 **Quantitation of Chill-Induced Release of a Tubulin-Like Factor and Its Prevention by Abscisic Acid in *Gossypium hirsutum* L.**—Arnon Rikin, Dan Atsmon, and Carlos Gitler

749 **Frost Injury and Heterogeneous Ice Nucleation in Leaves of Tuber-Bearing *Solanum* Species. Ice Nucleation Activity of External Source of Nucleants**—Channa B. Rajashekar, Paul H. Li, and John V. Carter

756 **Manipulation by Tridemorph, a Systemic Fungicide, of the Sterol Composition of Maize Leaves and Roots**—Michèle Bladocha and Pierre Benveniste

763 **Changes in Tobacco Cell Membrane Composition and Structure Caused by Cercosporin**—Margaret E. Daub and Steven P. Briggs

767 **Putrescine and Acid Stress. Induction of Arginine Decarboxylase Activity and Putrescine Accumulation by Low pH**—Nevin D. Young and Arthur W. Galston

772 **Mechanism of Glyoxylate Decarboxylation in the Glycolate Pathway in *Euglena gracilis* Z. Participation of $Mn^{2+}$-Dependent NADPH Oxidase in Chloroplasts**—Akiho Yokota, Akiko Kawabata, and Shozaburo Kitaoka

777 **Pigment Analysis of Chloroplast Pigment-Protein Complexes in Wheat**—Kenneth Eskins, Murray E. Duysen, and Linda Olson

780 **Intracellular Localization of Aspartate Kinase and the Enzymes of Threonine and Methionine Biosynthesis in Green Leaves**—Roger M. Wallsgrove, Peter J. Lea, and Benjamin J. Miflin

785 **DNA Content of *Beta vulgaris* Chloroplasts during Leaf Cell Expansion**—Martin J. Tymms, N. Steele Scott, and John V. Possingham

789 **Stomatal Sensitivity to Carbon Dioxide and Humidity. A Comparison of Two $C_3$ and Two $C_4$ Grass Species**—James I. L. Morison and Roger M. Gifford

797 **Proteolytic Activity in Soybean Root Nodules. Activity in Host Cell Cytosol and Bacteroids throughout Physiological Development and Senescence**—Nancy E. Pfeiffer, Cecilia M. Torres, and Fred W. Wagner

803 **Mechanisms of Citrate Transport and Exchange in Corn Mitochondria**—Paul R. Birnberg and John B. Hanson

810 **An Interpretation of Some Whole Plant Water Transport Phenomena**—Edwin L. Fiscus, Arnold Klute, and Merrill R. Kaufmann

818 **Role of Sucrose-Phosphate Synthase in Partitioning of Carbon in Leaves**—Steven C. Huber

822 **Changes in the Activities of Pyrrolooxygenases during the Germination of Wheat Grains**—Adriana R. Sburlati and Rosalía B. Frydman

828 **Promotion of Fern Rhizoid Elongation by Metal Ions and**

**the Function of the Spore Coat as an Ion Reservoir**—John H. Miller, Thomas C. Vogelmann, and Alix R. Bassel

835 **Xylem and Phloem Transport and the Functional Economy of Carbon and Nitrogen of a Legume Leaf**—John Stewart Pate and Craig Anthony Atkins

841 **Amino Acid Transport and Metabolism in Relation to the Nitrogen Economy of a Legume Leaf**—Craig A. Atkins, John S. Pate, Mark B. Peoples, and Kenneth W. Joy

849 **Hydrogenation of Geranylgeraniol. Two Pathways Exist in Spinach Chloroplasts**—Jürgen Soll, Gernot Schultz, Wolfhart Rüdiger, and Jürgen Benz

855 **Limiting Factors in Photosynthesis. IV. Iron Stress-Mediated Changes in Light-Harvesting and Electron Transport Capacity and Its Effects on Photosynthesis *in Vivo***—Norman Terry

861 **Quantitative Changes in *In Vitro* and *In Vivo* Protein Synthesis in Aging and Rejuvenated Soybean Cotyledons**—Ronald W. Skadsen and Joe H. Cherry

869 **Isolation and Characterization of Infected and Uninfected Cells from Soybean Nodules. Role of Uninfected Cells in Ureide Synthesis**—Joanna F. Hanks, Karel Schubert, and N. E. Tolbert

874 **Evidence for the Presence in Tobacco Leaves of Multiple Enzymes for the Oxidation of Glycolate and Glyoxylate**—Evelyn A. Havir

879 **Purification and Characterization of *Griffonia simplicifolia* Leaf Lectins**—Jamie E. Lamb, Satoaki Shibata, and Irwin J. Goldstein

888 **Ammonia Exchange and Photorespiration in *Chlamydomonas***—Gilles Peltier and Pierre Thibault

893 **Age Dependence of Photosynthesis in the Caribou Lichen *Cladina stellaris***—Martin J. Lechowicz

896 **Gramine Accumulation in Leaves of Barley Grown under High-Temperature Stress**—Andrew D. Hanson, Kimberly M. Ditz, George W. Singletary, and Timothy J. Leland

905 **Reduced Osmotic Potential Effects on Photosynthesis. Identification of Stromal Acidification as a Mediating Factor**—Gerald A. Berkowitz and Martin Gibbs

912 **Inhibition of Glutamine Synthetase from Pea by Tabtoxinine-β-lactam**—Michael D. Thomas, Pat J. Langston-Unkefer, Thomas F. Uchytil, and Richard D. Durbin

916 **Host-Pathogen Interactions. XXII. A Galacturonic Acid Oligosaccharide from Plant Cell Walls Elicits Phytoalexins**—Eugene A. Nothnagel, Michael McNeil, Peter Albersheim, and Anne Dell

927 **Auxin Requirements of Sycamore Cells in Suspension Culture**—Maurice M. Moloney, John F. Hall, Gillian M. Robinson, and Malcolm C. Elliott

932 **Plant 5-Methylthioribose Kinase. Properties of the Partially Purified Enzyme from Yellow Lupin (*Lupinus luteus* L.) Seeds**—Andrzej Guranowski

936 **Analysis of the Role of the Phosphate Translocator and External Metabolites in Steady-State Chloroplast Photosynthesis**—Archie R. Portis, Jr.

944 **Photosynthetic Characteristics of $C_3$-$C_4$ Intermediate *Flaveria* Species. I. Leaf Anatomy, Photosynthetic Responses to $O_2$ and $CO_2$, and Activities of Key Enzymes in the $C_3$ and $C_4$ Pathways**—Maurice S. B. Ku, Russell K. Monson, Robert O. Littlejohn, Jr., Hitoshi Nakamoto, Donald B. Fisher, and Gerald E. Edwards

949 **Mechanism of Iron Uptake by Peanut Plants. I. $Fe^{III}$ Reduction, Chelate Splitting, and Release of Phenolics**—Volker Römheld and Horst Marschner

955 **Photosynthesis and Activation of Ribulose Bisphosphate Carboxylase in Wheat Seedlings. Regulation by $CO_2$ and $O_2$**—John T. Perchorowicz and Richard G. Jensen

961 **Aminotransfer from Alanine and Glutamate to Glycine and Serine during Photorespiration in Oat Leaves**—Thomas Betsche

**SHORT COMMUNICATIONS**

966 **Ploidy Effects in Isogenic Populations of Alfalfa (*Medicago sativa* L.). IV. Similarity in Physical and Kinetic Properties of Ribulose-1,5-bisphosphate Carboxylase/Oxygenase**—Steven P. Meyers, A. Chris Brinegar, Larry E. Schrader, Douglas B. Jordan, and William L. Ogren

969 **Role of Magnesium in the Plasma Membrane ATPase of Red Beet**—Donald P. Briskin and Ronald J. Poole

972 **Complete Release of Axillary Buds from Apical Dominance in Intact, Light-Grown Seedlings of *Pisum sativum* L. following a Single Application of Cytokinin**—Indiren Pillay and Ian D. Railton

975 **Growth Response of *Halophila engelmanni* Aschers. to Sulfide, Copper, and Organic Nitrogen in Marine Sediments**—Warren M. Pulich, Jr.
